## Annexure I

### 1. Management Information System {MIS} at Mumbai

#### 1.1 Basic Business Need

SIDBI has many application software to cater to its varied business schemes. For e.g. Direct Finance System (DFS) caters to all the direct Credit schemes (except Receivable Finance), Bills Finance System (BFS) caters to the Receivable Finance schemes, Refinance Software (RFS) caters to the Indirect Finance schemes and Non Computerized System (NCS) caters to the schemes which do not have a full fledged software to take care of their accounting requirements but need to be captured for the purposes of MIS reporting.

MIS software collates data from all the above Application Systems daily at the end of the day and provides consolidated reports for all schemes / branches / verticals / funds. It caters to the reporting requirements of HO Verticals, ROs, BOs and outside institutions like RBI, Statutory Auditors, CIBIL, Government of India etc.

MIS software is available to all the users across all the branches in the Bank for the purpose of generating reports. It is connected to central database & application servers at Data-Centre.

#### 1.2 Functionality and Process Flow in brief

- Transaction data from various Application Systems is populated into MIS database on an incremental basis and is frozen to maintain consistency in reporting.
- The user is given an option to choose various parameters like 'Type of Outstanding' [OS as per Subsidiary Ledger or Gross OS (SL OS minus PWO) or Net OS (Gross OS minus provisioning)], 'From Date', 'To Date / As on Date', 'Vertical Selection', 'Branch Selection', 'Scheme Selection', 'Loan Type' [Direct / Indirect / Investments / All] and 'Unit of Amount' before generating a report so as to get the desired output.
- Similar reports have been grouped together, making it easier for users to locate the desired reports. For example, reports for Application Monitoring, NPA, Business Performance, Undrawn Sanctions, Industry / Industry Group wise Outstanding, Top-n Customer details, Account wise details, Exposure, RBI Reporting, Audit / NBFC / IFV / RFSV / Controllable Expenditure / Compliance Monitoring / Interest Income etc have been grouped together.
- A Customer Datasheet view has been provided to view complete snapshot of a customer. All accounts across all schemes and all branches are displayed on a single page including security details, Rating history and Asset Class movement. Both Assets and Liabilities of the selected customer are shown.
- Mobile App Data View has been created to facilitate the Branch In-charge / Relationship Manager to have a consolidated view of account information as well as interaction information.
- Report output is generally in html file which can be easily imported to MS Excel for any further grouping or analysis.
- A provision has been made for Data Extraction to facilitate the users to extract the required data themselves. This data can be imported to MS Excel and required analysis and grouping can be done. CIBIL data can also be extracted using this option.
- MIS software generates alerts for standard account overdues, SMA1, SMA2, NPAs, Recovery performance, Exposure, Security, Compliances, Controllable expenses etc.

- MIS also generates a daily Dashboard for use of senior executives to give snapshot of business being done across BH1, BH2, Regional offices and Branch offices vis-a-vis targets assigned to them.
- There are around 200 reports available under MIS reports.
- Besides Application Software mentioned above, the software is also integrated with CIF (Customer Database), GL, RNMS (NPA monitoring), RAM (Rating module), Due Diligence, CART AMM (Internal rating, application inward and sanction), Exposure monitoring module, Controllable expenses module, Compliance Monitoring module etc for reporting purposes.

## **6. Resource Management Software (RMS) (Resource raising – Fixed Deposit)**

### **6.1 Introduction**

Resource Management Software (RMS) is designed to serve as the in-house software to track raising, management and servicing of resources and debt (apart from Treasury). This forms one of the critical applications for RMV. This application is interfaced with the applications like GL, MIS, BI/MIS and ALM Systems. Information flows to and from these applications.

The RMS software is hosted along with other applications in the CITRIX platform. Only after logging into CITRIX, the user can access the RMS software. While creating the entry, the user needs to select the product type i.e. Fixed Deposit or MSME. Also the user needs to select the Schemes available under different product types.

The details of schemes are given below:

#### **Fixed Deposit**

- CLCSS 0% DEPOSIT
- QCAP
- QUATERLY COMPOUNTING
- QUATERLY INCOME

#### **MSME**

- MSME – India's Opportunity Fund
- MSME – Refinance Fund
- MSME – Risk Capital Fund
- MSME – VENTURE CAPITAL FUND

### **6.2 Hardware/ Software platforms**

<b><u>Hardware Requirement</u></b>	<b><u>Software Requirements</u></b>
RAM – 2 GB	Citrix client receiver enterprise 4.5.0.0

### **6.3 Application Overview**

The operations under RMS software have been categorized into various modules based on the functional features. Below is the list of modules present in the RMS Software.

- Application Entry /Approval
- Application Contra / Approval
- FD Payments (Interest/ Brokerage/ TDS)
- MSME Interest payment
- Tax Exemption Updation and UIN Generation - FD
- Tax Exemption Updation and UIN Generation – Bonds
- Closure Entry / Approval (Normal / Preclosure)
- Reports
- Day Begin / End (BOD / EOD)
- TDS Acknowledgement / ECS Entry

- Modifications / Updation of FD

In tune with the core banking solution practices, interest accrues on daily basis and is periodically accounted for the end of the month. For calculating the interest, **Actual / Actual day count basis** has been adopted. The compounding / payment of interest would take place at the end of compounding / payment period with reference to the date of deposit.

Tax deduction at Source (TDS) is also accounted on the interest generated. Interest income on Fixed deposit attracts deduction of tax at source under section 194 A of the IT Act 1961 at the applicable rate. TDS has to be deducted on interest income in excess of Rs. 5,000/- per year. The applicable rate of TDS, based on the submission of PAN details are:

- a. PAN details furnished : 10% on the interest compounded/ paid/ accrued,
- b. PAN details not furnished: 20% on the interest compounded/ paid/ accrued.

1, 2: आईएफएससी/एमआईसीआर के बारे में टिप्पणी

भारतीय वित्तीय प्रणाली कूट एक अक्षरांकीय/वर्णांकीय कूट है, जो भारत में किसी बैंक-शाखा की अनन्य रूप से पहचान के लिए बनाया गया है। यह 11 अंकों का कूट है, जिसमें प्रथम 4 अक्षर बैंक के कूट को दर्शाते हैं, जबकि पाँचवाँ अंक नियंत्रण अंक के रूप आरक्षित है (वर्तमान में पाँचवें स्थान पर 0 है) तथा शेष अंक शाखा की पहचान

हैं। चेक पर अंकित एमआईसीआर कूट (चुम्बकीय स्याही अंक पहचान) में 9 अंक होते हैं, जिनसे बैंक-शाखा की पहचान होती है। भा.रि.बैंक ने सभी बैंकों को सूचित किया है कि वे अपने ग्राहकों को जारी किए जाने वाले चेक पत्रकों पर आईएफएससी मुद्रित कराएँ। कोई ग्राहक भी अपनी बैंक-शाखा से संपर्क कर उस शाखा का आईएफएस कूट प्राप्त कर सकता है।

**1, 2: Note on IFSC / MICR**

Indian Financial System Code (IFSC) is an alpha numeric code designed to uniquely identify the bank-branches in India. This is 11 digit code with first 4 characters representing the bank's code, the next character reserved as control character (presently 0 appears in the fifth position) and remaining 6 characters to identify the branch. The MICR code, (Magnetic Ink Character Recognition) that appears on cheques, has 9 digits to identify the bank-branch. RBI had since advised all the banks to print IFSC on cheque leaves issued to their customers. A customer may also contact his bank-branch and get the IFS Code of that branch.
